## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Agrawal et al (Agrawal), U.S. Patent Pub. No. 2002/0193114.

3. Regarding claims 1 and 6, Agrawal discloses a) detecting that a channel quality between a mobile client and a first base station remains above a drop threshold and that a channel quality between said mobile client and a second base station increases from below to above and add threshold; and b) sending a first multiple description bitstream from said first base station to said mobile client and sending a second multiple description bitstream from said second base station to said mobile client (0060, 0061, 0074, 0081).

Regarding claims 2 and 7, Agrawal discloses the steps of: prior to said step a) said sending said first multiple description bitstream and said second multiple description bitstream from said first base station to said mobile client such that said

Art Unit: 2681

mobile client receives said first multiple description bitstream and said second multiple description bitstream from said first base station (0061).

Regarding claims 3 and 8, Agrawal discloses wherein said step a) further comprises the step of: i) ceasing sending said second multiple description bitstream from said first base station to said mobile client (0088).

Regarding claims 4 and 9, Agrawal discloses the steps of: c) detecting that said channel quality from said first base station to said mobile client drops below a drop threshold value; and d) dropping said channel between said first base station and said mobile client such that said mobile client does not receive said first multiple description bitstream from said first base station (0088).

Regarding claims 5 and 10, Agrawal discloses the step of: e) upon dropping said channel between said first base station and said mobile client. sending said first multiple description bitstream from said second base station to said mobile client such that said mobile client receives said first multiple description bitstream and said second multiple description bitstream from said second base station (0087, 0088).

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Frodigh et al, U.S. Patent No. 6,381,458, discloses soft handoff control based in access network capacity.

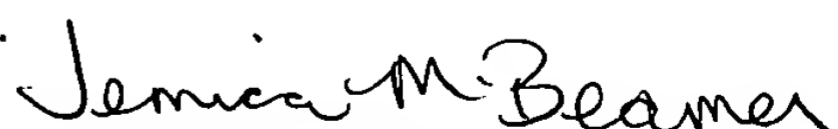

Tiedemann, Jr. et al, U.S. Publication No. 2001/0034233, discloses common channel soft handoff.

Chen et al, U.S. Patent Publication No. 2002/0191561, discloses packet distribution and selection in soft handoff for IP-based base stations among multiple subnets.
